

# Addition and Subtraction Story Problems

In the grasslands, 6 lions are resting under a tree. Soon, 5 more lions join them. How many lions are there in total?

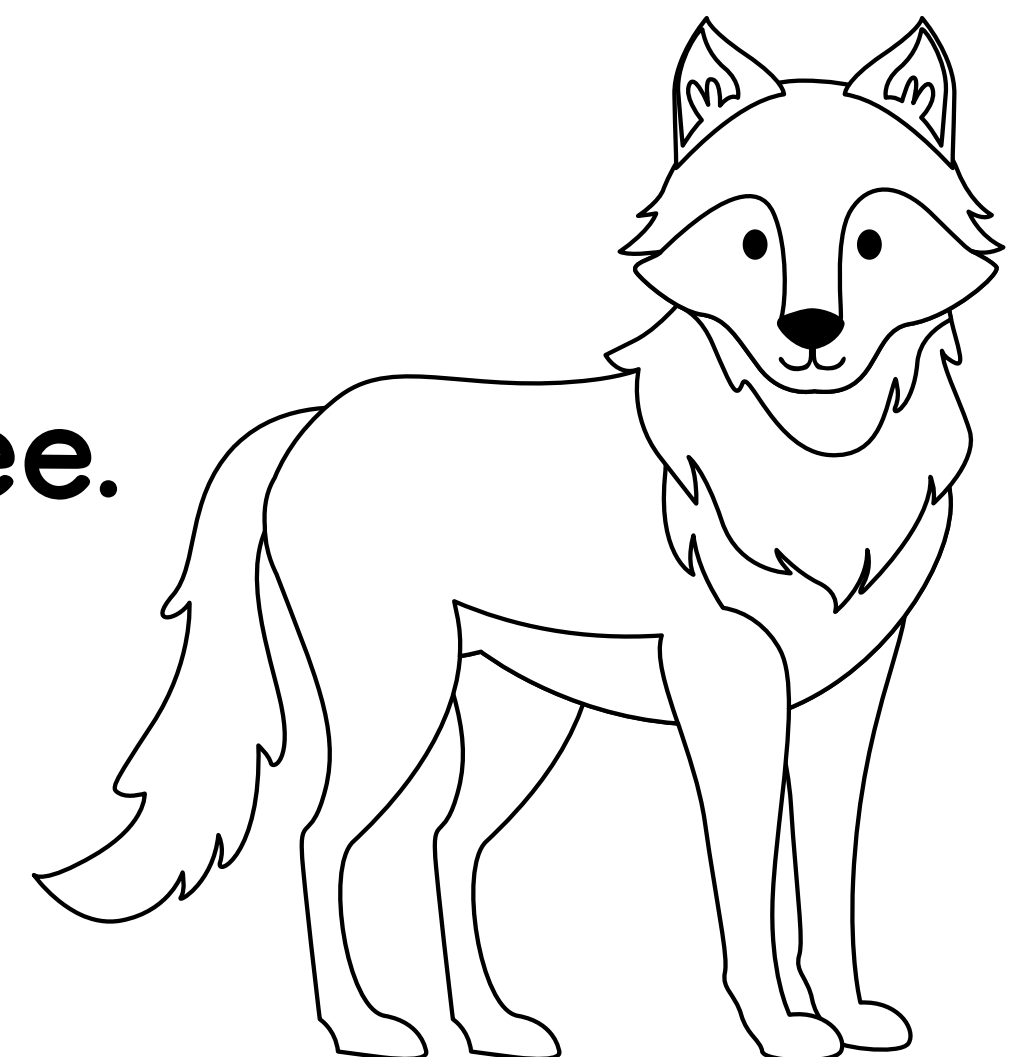

At the river, 8 otters are splashing and playing in the water. Then, 3 otters swim away. How many otters are still playing in the water?

A pack of 9 wolves is running through the snowy forest. Later, 4 more wolves join them. How many wolves are in the pack now?

After a while, 5 wolves go to rest under a tree. How many wolves are still running?

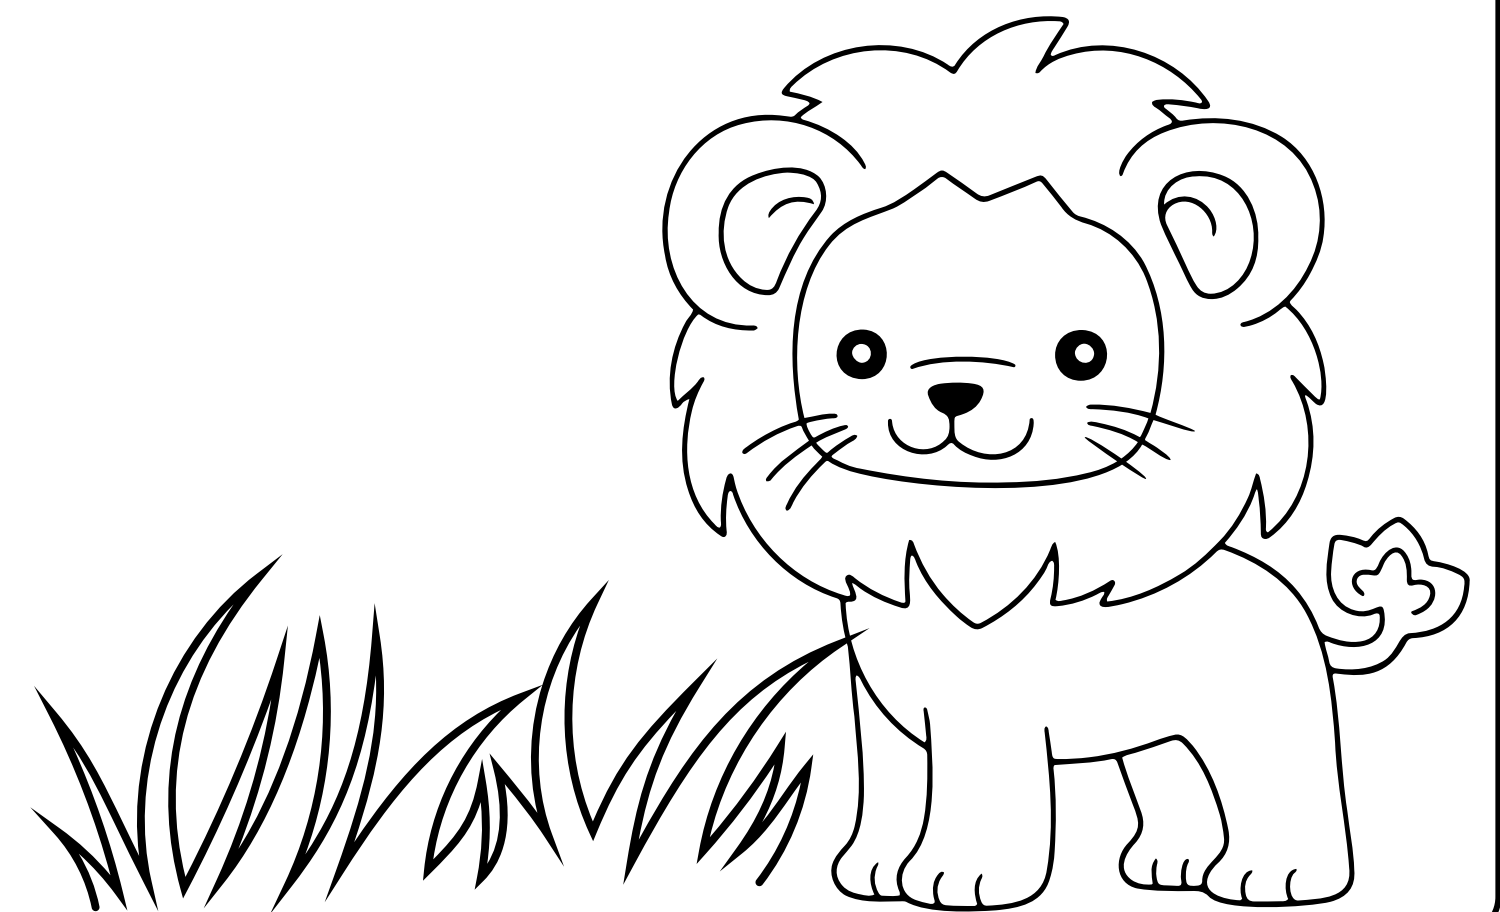

# Addition and Subtraction Story Problems

In the grasslands, 6 lions are resting under a tree. Soon, 5 more lions join them. How many lions are there in total?

$$6 + 5 = 11$$

There are 11 lions in total.

At the river, 8 otters are splashing and playing in the water. Then, 3 otters swim away. How many otters are still playing in the water?

$$8 - 3 = 5$$

There are 5 otters still playing in the water.

A pack of 9 wolves is running through the snowy forest. Later, 4 more wolves join them. How many wolves are in the pack now?

$$9 + 4 = 13$$
 There are 13 wolves in the pack now.

After a while, 5 wolves go to rest under a tree. How many wolves are still running?

There are 8 wolves still running.
