# 2 Digit Subtraction

Story Problems

There were 56 whales swimming in the ocean. 24 whales swam away to another part of the sea.

How many whales are left?

There were 62 sharks swimming near the reef. 30 sharks swam off into the deep ocean.

How many sharks are left?

A group of 42 deer were grazing in a field. Suddenly, 21 deer ran into the forest. How many deer are still in the field?
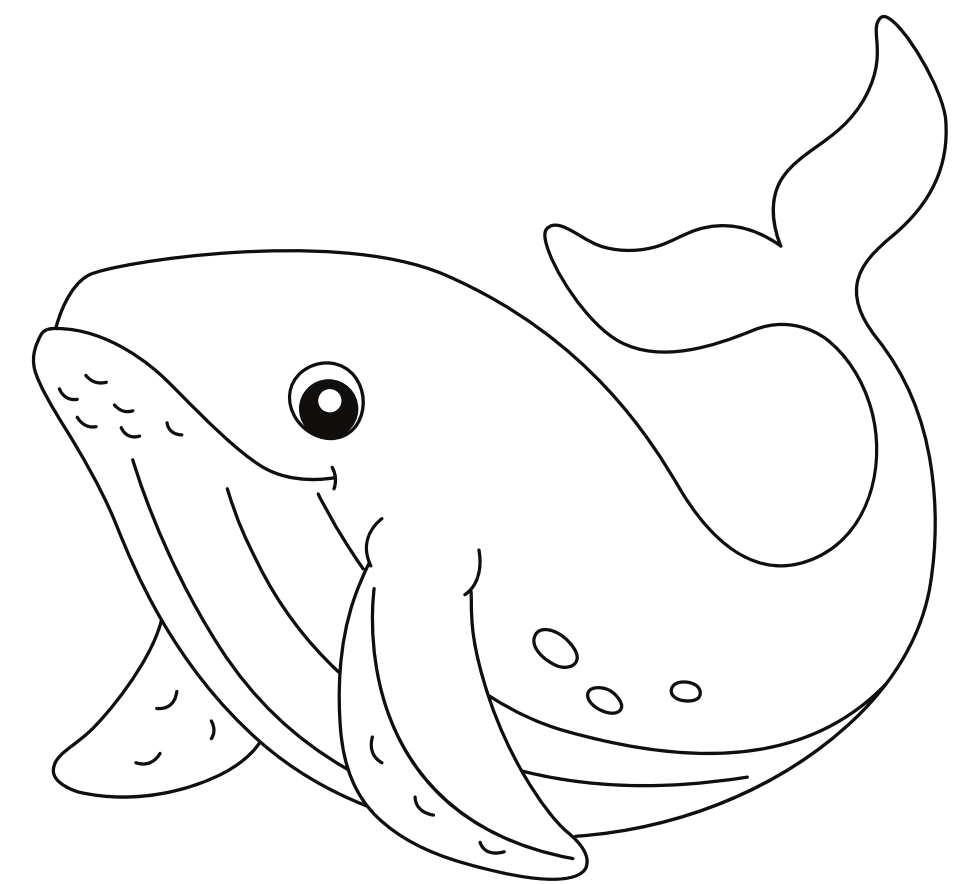

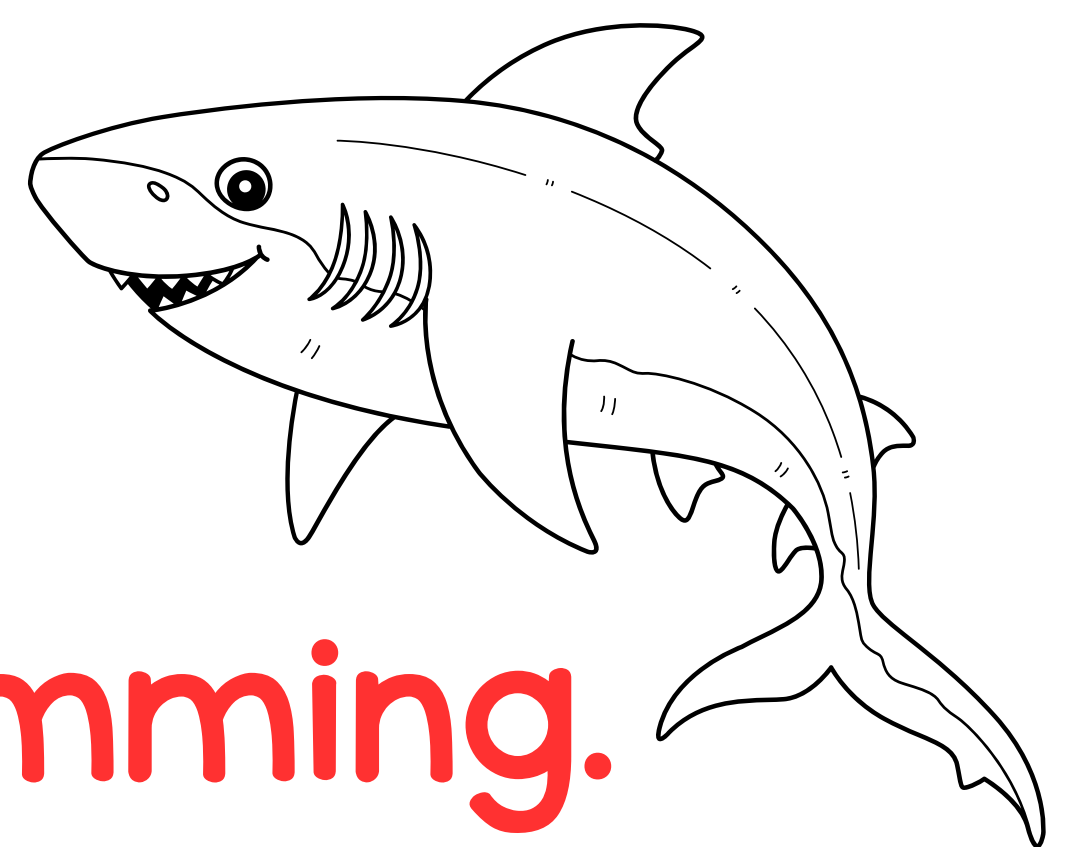

2 Digit Subtraction

Story Problems

There were 56 whales swimming in the ocean. 24 whales swam away to another part of the sea. How many whales are left?

56 – 24 = 32 whales left.

There were 62 sharks swimming near the reef. 30 sharks swam off into the deep ocean. How many sharks are left?

62 – 30 = 32 sharks still swimming.

A group of 42 deer were grazing in a field. Suddenly, 21 deer ran into the forest. How many deer are still in the field?

42 – 21 = 21 deer still grazing.
